Undesirable Effects and Serious Undesirable Effects related to the product

This product is intended for cleaning hard surfaces but will also be used as a hand wipe. All of the ingredients are well known and have a history of safe use in the marketplace with no reports of a significant number of adverse reactions.

Skin Toxicity

This product as supplied may cause slight skin irritation on certain individuals especially if exposure is prolonged and/or repeated. There are low levels of substances present in this product which are known to cause an allergic reaction. The concentrations are sufficiently low not to present a risk of inducing allergy. However people already sensitised may show an adverse reaction when using the product.

Eye Toxicity

The product may cause temporary eye irritation if accidentally comes into contact with the eyes.

Oral Toxicity

Although ingestion is unlikely, if the liquid in the container is accidentally swallowed in small amounts it is unlikely to cause any adverse effects.

Inhalation Toxicity

It is unlikely that inhalation will be a route of exposure.
