SAFETY DATA SHEET
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1. Product identifier

Product name: BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

REACH registration notes: No REACH registration number required as this product is a mixture.

1.2. Relevant identified uses of the substance or mixture and uses advised against

Identified uses: GLAZING COMPOUND OR FILLER

Uses advised against: No specific uses advised against are identified.

1.3. Details of the supplier of the safety data sheet

Supplier: Bartoline Limited
Barmston Close
Beverley
East Yorkshire
HU17 0LW
01482 678710
info@bartoline.co.uk

Contact person: Product Compliance Manager

1.4. Emergency telephone number

Emergency telephone: 01482 678710 (8.30am - 4.45pm Monday to Friday) or NHS 111 (General Public) (24 Hour service)

National emergency telephone number: National Poisons Information Service (24hours) 0844 892 0111

SECTION 2: Hazards identification

2.1. Classification of the substance or mixture

Classification (EC 1272/2008)

Physical hazards: Not Classified

Health hazards: Not Classified

Environmental hazards: Not Classified

2.2. Label elements

Hazard statements: NC Not Classified

2.3. Other hazards

This product is not subject to classification according to the calculation method of the EU Classification, Labelling and Packaging Regulation. When used and handled as directed the product does not have any harmful effects to our experience and the information provided to us.
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

SECTION 3: Composition/information on ingredients

3.2. Mixtures
Composition comments Homogeneous mixture of mineral filler, linseed oil, plasticiser and white spirit.

SECTION 4: First aid measures

4.1. Description of first aid measures
General information This is a non hazardous mixture and as such any ill health effects are unlikely to have been caused by contact with this product. If medical advice is needed, have product container or label at hand. Treat symptomatically. Show this Safety Data Sheet to the medical personnel.

Inhalation Unlikely route of exposure. Due to the small packaging, the risk of inhalation is minimal. Move affected person to fresh air and keep warm and at rest in a position comfortable for breathing. General first aid, rest, warmth and fresh air.

Ingestion Remove person to fresh air and keep comfortable for breathing. Rinse out mouth and then drink plenty of water if person is conscious. NEVER MAKE AN UNCONSCIOUS PERSON VOMIT OR DRINK FLUIDS.

Skin contact Remove contaminated clothing. Wash the skin immediately with soap and water. Get medical attention promptly if symptoms occur after washing.

Eye contact Immediately flush with plenty of water for up to 15 minutes. Remove any contact lenses and open eyelids wide apart. Get medical attention if irritation persists after washing.

Protection of first aiders This is a non hazardous product and therefore no protection should be required, however consideration should be given to other contaminants in the workplace. No specific requirements are anticipated under normal conditions of use. First aid personnel should wear appropriate protective equipment during any rescue.

4.2. Most important symptoms and effects, both acute and delayed
General information See Section 11 for additional information on health hazards.

Inhalation No specific symptoms known.

Ingestion There may be soreness and redness of the mouth and throat.

Skin contact There may be mild irritation at the site of contact.

Eye contact Irritating and may cause redness and pain.

4.3. Indication of any immediate medical attention and special treatment needed
Notes for the doctor Treat symptomatically.

Specific treatments No specific chemical antidote is known to be required after exposure to this product.

SECTION 5: Firefighting measures

5.1. Extinguishing media
Suitable extinguishing media The product is non-combustible. Use fire-extinguishing media suitable for the surrounding fire.

Unsuitable extinguishing media None known.

5.2. Special hazards arising from the substance or mixture
Specific hazards No specific precautions due to the small quantities handled.

Hazardous combustion products None known. Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.
5.3. Advice for firefighters

Protective actions during firefighting

No specific firefighting precautions known.

Special protective equipment for firefighters

In case of a large fire or in confined or poorly ventilated spaces, wear full fire resistant protective clothing and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions

Wear protective clothing as described in Section 8 of this safety data sheet.

6.2. Environmental precautions

Environmental precautions

As this product is only supplied in small quantities there is a low risk of any environmental damage.

6.3. Methods and material for containment and cleaning up

Methods for cleaning up

For waste disposal, see Section 13. No specific clean-up procedure recommended. Pick up mechanically or by hand.

6.4. Reference to other sections

Reference to other sections

Wear protective clothing as described in Section 8 of this safety data sheet. See Section 11 for additional information on health hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling

Usage precautions

This is a non hazardous product. Read and follow manufacturer's recommendations.

Advice on general occupational hygiene

No specific hygiene procedures recommended but good personal hygiene practices should always be observed when working with chemical products. Do not eat, drink or smoke when using this product.

7.2. Conditions for safe storage, including any incompatibilities

Storage precautions

Protect from freezing and direct sunlight. Keep container dry. Keep in a cool, well ventilated place.

Storage class

Unspecified storage.
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

7.3. Specific end use(s)

Specific end use(s)  
The identified uses for this product are detailed in Section 1.2.

Usage description  
Apply "common sense" measures when handling this product. Always follow on pack instructions when using this product. Keep out of reach of children. Keep containers closed when not in use.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters

8.1.1. Occupational exposure limits

There are no occupational exposure limits for the product as a whole. See information for listed hazardous ingredients.

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics.

Long-term exposure limit (8-hour TWA): 1200 mg/m³, CEFIC - HSPA recommended WEL

8.2. Exposure controls

8.2.1. Appropriate engineering controls

Protective engineering solutions should be implemented, and in use, before Personal Protective Equipment (PPE) is considered.

8.2.2. Personal protection

This product is supplied in ready to use tubs, and when used correctly, poses very little risk to man or the environment.

8.2.3. Eye/face protection

No specific eye protection required during normal use. Where there is a risk of splashes to the eyes it is recommended that safety glasses/goggles approved to EN166 standard are worn.

8.2.4. Hand protection

Although the product is not classified as a skin irritant, the wearing of gloves is recommended for people with sensitive skin or for prolonged or repeated use. Barrier cream applied before work may make it easier to clean the skin after exposure, but does not prevent absorption through the skin. To protect hands from chemicals, gloves should comply with European Standard EN374. Wear protective gloves made of the following material: Polyvinyl alcohol (PVA). Viton rubber (fluoro rubber). Nitrile rubber. Polyvinyl chloride (PVC). Rubber (natural, latex).

8.2.5. Other skin and body protection

No specific requirements are anticipated under normal conditions of use.

8.2.6. Hygiene measures

Good personal hygiene procedures should be implemented. Wash promptly with soap and water if skin becomes contaminated. Wash after use and before eating, smoking and using the toilet. Remove contaminated clothing and wash the skin thoroughly with soap and water after work.

8.2.7. Respiratory protection

No specific requirements are anticipated under normal conditions of use.

8.2.8. Thermal hazards

Not Applicable

9.2. Other information

Other information
None.

SECTION 10: Stability and reactivity

10.1. Reactivity

Reactivity
There are no known reactivity hazards associated with this product.

10.2. Chemical stability
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

Stability
Stable at normal ambient temperatures and when used as recommended. Stable under the prescribed storage conditions.

10.3. Possibility of hazardous reactions
Possibility of hazardous reactions
No potentially hazardous reactions known.

10.4. Conditions to avoid
Conditions to avoid
Avoid frost.

10.5. Incompatible materials
Materials to avoid
None known.

10.6. Hazardous decomposition products
Hazardous decomposition products
Thermal decomposition or combustion may liberate carbon oxides and other toxic gases or vapours.

SECTION 11: Toxicological information

11.1. Information on toxicological effects

Toxicological effects
This product has low toxicity. Only large volumes may have adverse impact on human health. See information on individual substances below. Unless stated otherwise the data quoted below is for the hazardous ingredients.

Skin corrosion/irritation
Based on available data the classification criteria are not met. (Mixture as a whole)

Serious eye damage/irritation
Based on available data the classification criteria are not met. (Mixture as a whole)

Respiratory sensitisation
Based on available data the classification criteria are not met. (Mixture as a whole)

Skin sensitisation
Based on available data the classification criteria are not met. (Mixture as a whole)

Germ cell mutagenicity
Based on available data the classification criteria are not met. (Mixture as a whole)

Genotoxicity - in vitro
Based on available data the classification criteria are not met. (Mixture as a whole)

Genotoxicity - in vivo
Based on available data the classification criteria are not met. (Mixture as a whole)

Carcinogenicity
Carcinogenicity
Based on available data the classification criteria are not met. (Mixture as a whole)

Reproductive toxicity
Reproductive toxicity - fertility
Based on available data the classification criteria are not met. (Mixture as a whole)

Reproductive toxicity - development
Based on available data the classification criteria are not met. (Mixture as a whole)

Specific target organ toxicity - single exposure
STOT - single exposure
Based on available data the classification criteria are not met. (Mixture as a whole)

Specific target organ toxicity - repeated exposure
STOT - repeated exposure
Based on available data the classification criteria are not met. (Mixture as a whole)

Aspiration hazard
Aspiration hazard
Based on available data the classification criteria are not met. (Mixture as a whole)
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

**Inhalation**
The product is considered to be a low hazard under normal conditions of use. (Mixture as a whole)

**Ingestion**
No harmful effects expected from quantities likely to be ingested by accident. (Mixture as a whole)

**Skin contact**
The product is considered to be a low hazard under normal conditions of use. Repeated exposure may cause skin dryness or cracking. (Mixture as a whole)

**Eye contact**
The product is considered to be a low hazard under normal conditions of use. May be slightly irritating to eyes. There may be mild irritation and redness. (Mixture as a whole)

**Toxicological information on ingredients.**

*Hydrocarbons, C9-C11, n-alkanes, isomalkanes, cyclics, <2% aromatics.*

**Skin corrosion/irritation**
Animal data: Oedema score: No oedema (0).

**Serious eye damage/irritation**
This substance does not meet the EU criteria for classification. - Burning feeling and temporary redness.

**Respiratory sensitisation**
Based on available data the classification criteria are not met.

**Skin sensitisation**
Based on available data the classification criteria are not met.

**Germ cell mutagenicity**
Genotoxicity - in vitro: Negative.
Genotoxicity - in vivo: Negative.
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

**Carcinogenicity**
Based on available data the classification criteria are not met.

**Reproductive toxicity**
Results of guideline developmental toxicity studies on the substance and OECD developmental toxicity screening studies showed no evidence of developmental toxicity in rats.

**Specific target organ toxicity - single exposure**
- **STOT - single exposure**: Vapours may cause drowsiness and dizziness.
- **Target organs**: Central nervous system

**Specific target organ toxicity - repeated exposure**
- **STOT - repeated exposure**: Not classified as a specific target organ toxicant after repeated exposure.

**Aspiration hazard**
- **Aspiration hazard**: May be fatal if swallowed and enters airways. Entry into the lungs following ingestion or vomiting may cause chemical pneumonitis.

**Inhalation**
Vapours inhaled in strong concentrations have a narcotic effect on the central nervous system. Irritation of the respiratory tract due to excessive fume. Causes headache, drowsiness or other effects to the central nervous system, loss of consciousness.

**Ingestion**
Symptoms: Nausea, vomiting, abdominal pain. Harmful: If swallowed accidentally, the product may enter the lungs due to its low viscosity and lead to the rapid development of very serious inhalation pulmonary lesions (medical survey during 48 hours). Pneumonia may be the result if vomited material containing solvents reaches the lungs.

**Skin contact**
Repeated exposure may cause skin dryness or cracking.

**Eye contact**
This mixture does not meet the EU criteria for classification. Any eye contact may cause a burning feeling and temporary redness.

**Route of exposure**
Inhalation Ingestion Skin and/or eye contact Dermal

**Target organs**
Central nervous system Eyes Respiratory system, lungs Skin

**Medical symptoms**
Symptoms following overexposure may include the following: Central nervous system depression. Coughing, chest tightness, feeling of chest pressure. Diarrhoea. Dry skin. Headache. Irritation.

**Medical considerations**
The following pre-existing or historic medical conditions of the worker may lead to an increased risk of adverse health effects following exposure to this product: History of alcoholism. Chronic respiratory and obstructive airway diseases. History of smoking. Pre-existing eye problems. Skin disorders and allergies.

**SECTION 12: Ecological information**

**Ecotoxicity**
No information on supplier MSDS.

**Ecological information on ingredients.**
Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics.
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

Ecotoxicity

The product components are not classified as environmentally hazardous. However, large or frequent spills may have hazardous effects on the environment.

12.1. Toxicity

Toxicity

The product is not classified as dangerous for the environment but contains small amount of substances so classified.

Ecological information on ingredients.

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics.

Acute aquatic toxicity

Acute toxicity - fish  
LL₅₀, 96 hour: >1000 mg/l, Oncorhynchus mykiss (Rainbow trout)

Acute toxicity - aquatic invertebrates  
EC₈₀, 48 hours: >1000 mg/l, Daphnia magna

Acute toxicity - aquatic plants  
EC₈₀, 72 hours: >1000 mg/l, Pseudokirchneriella subcapitata

Acute toxicity - terrestrial  
Not available.

Chronic aquatic toxicity

Chronic toxicity - fish early life stage  
NOEC, 28 days: 0.13 mg/l, Oncorhynchus mykiss (Rainbow trout), QSAR petrotox

Chronic toxicity - aquatic invertebrates  
NOEC, 21 days: 0.23 mg/l, Daphnia magna, QSAR Petrotox

Toxicity to soil  
Substance is a hydrocarbon UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for the risk assessment of this complex substance.

12.2. Persistence and degradability

Persistence and degradability  
No data available.

Phototransformation  
Not available.

Stability (hydrolysis)  
Not available.

Biodegradation  
Not available.

Biological oxygen demand  
Not available.

Chemical oxygen demand  
Not available.

Ecological information on ingredients.

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics.

Persistence and degradability  
The product is readily biodegradable. 80% after 28 days (OECD 301F)

12.3. Bioaccumulative potential

Bioaccumulative potential  
No data available on bioaccumulation.

Partition coefficient  
Not available.

Ecological information on ingredients.

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics.
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

Bioaccumulative potential  Substance is a hydrocarbon UVCB. Standard tests for this endpoint are intended for single substances and are not appropriate for this complex substance.

12.4. Mobility in soil

Mobility  No data available.

Adsorption/desorption coefficient  Not available.

Henry's law constant  Not available.

Surface tension  Not available.

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB assessment  This mixture contains no substances considered to be either persistent, bioaccumulative and toxic (PBT), or very persistent and very bioaccumulative (vPvB) at levels of 0.1% or higher.

Ecological information on ingredients.

Hydrocarbons, C9-C11, n-alkanes, isoalkanes, cyclics, <2% aromatics.

Results of PBT and vPvB assessment  Not Classified as PBT/vPvB by current EU criteria.

12.6. Other adverse effects

Other adverse effects  None known.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

General information  The generation of waste should be minimised or avoided wherever possible. The packaging must be empty (drop-free when inverted). Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority.

Disposal methods  Disposal of this product, process solutions, residues and by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any local authority requirements. Avoid dispersal of spilled material and runoff and contact with soil, waterways, drains and sewers.

Waste class  When this product, as supplied becomes waste it should be disposed of using the following waste code. EU Waste Code 08 04 10: waste adhesives and sealants other than those mentioned in 08 04 09. Empty plastic containers can be disposed of using EU Waste code 15 01 02 plastic packaging. It is usually obvious if a container is ‘empty’, for example a half empty tin of solidified paint is not empty, but where there is a small amount of residual material a container will not be empty if that residual material can be removed by physical or mechanical means by applying normal industry standards or processes. This means that all reasonable efforts must have been made to remove any left-over contents from the container. This may involve for example washing, draining or scraping. The method of emptying will depend on the container and the type of material it contains. Note: if the design of the packaging, its aperture, or the adherent nature of the material does not permit it to be emptied then it will not be a packaging waste. If a container is not ‘empty’ it is not packaging waste. It should be classified on the basis of its contents and the source or activity that produced it. Part-used containers should be disposed of using waste code: EU Waste Code 08 04 10: Waste adhesives and sealants other than those mentioned in 08 04 09. These codes have been assigned based on the actual composition of the product as supplied. If mixed with other wastes, the waste codes quoted may not be applicable.
SECTION 14: Transport information

General
The product is not covered by international regulations on the transport of dangerous goods (IMDG, IATA, ADR/RID).

14.1. UN number
Not applicable.

14.2. UN proper shipping name
Not applicable.

14.3. Transport hazard class(es)
No transport warning sign required.

14.4. Packing group
Not applicable.

14.5. Environmental hazards
Environmentally hazardous substance/marine pollutant
No.

14.6. Special precautions for user
Not applicable.

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code
Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code
Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations
Control of Substances Hazardous to Health Regulations 2002 (as amended).
EH40/2005 Workplace exposure limits.
Health and Safety at Work etc. Act 1974 (as amended).

EU legislation

Guidance
Workplace Exposure Limits EH40.

Authorisations (Title VII Regulation 1907/2006)
No specific authorisations are known for this product.

Restrictions (Title VIII Regulation 1907/2006)
No specific restrictions on use are known for this product.

15.2. Chemical safety assessment
No chemical safety assessment has been carried out.
BARTOLINE - Linseed Oil Glazing Putty (Multi Purpose)

SECTION 16: Other information

General information
When surfaces are to be prepared for painting account must be taken of the age of the property and the possibility that lead may be present. As a working rule you should assume that this will be the case if the age of the property is pre 1960. Where possible wet flatting or chemical stripping methods should be used with surfaces of this type to avoid the formation of lead dust.

Training advice
The information on directions for use can be found on the product label. It is important to ensure that anyone using this product in the workplace has been adequately trained and in particular: The use of personal protective equipment, methods of cleaning up and disposal of waste. The basic first aid arrangements.

Revision comments
