

## Brush Restorer Technical Data Sheet

### Description

Bartoline Brush Restorer can be used to soften hardened brushes and is suitable for most paints. Emulsion paint may require longer treatment.

### Directions

Pour a quantity of the Bartoline Brush Restorer into a glass or metal container. Do not use plastic. Soak the brush in the solvent until it begins to soften, working the bristles against the side of the container to loosen the paint. For particularly hardened brushes this could take a number of hours and it is preferable to leave overnight. Re-immerses as many times as necessary. Wash out bristles in clean water and allow to drain. The remaining paint can be removed with a wire brush or painters comb. Protect floor coverings, textiles and vinyl materials.

### Health and Safety

See MSDS for full information.

### Technical Data

Measurement	Value	Test Method
Physical State	Liquid	Visual
Colour	Green	Visual
Odour	Aromatic solvent	
Boiling Point	140 - 200°C	
Flash point	43°C	
Density	0.875 – 0.895
