

Caustic Soda Technical Data Sheet

Description

Caustic soda is an extremely effective product which can be used for unblocking drains and pipes, general heavy duty cleaning and sanitising.

PLEASE ENSURE THE FOLLOWING PRECAUTIONS AND SAFETY INSTRUCTIONS ARE READ AND UNDERSTOOD PRIOR TO USING.

Precautions

Never add water to Caustic Soda, the Caustic Soda should always be added gently to water. Never use hot water when mixing, the process naturally generates heat. Always ensure that the Caustic Soda granules are completely dissolved prior to use. Thoroughly wash all equipment after use, using clean water. Replace the cap tightly if any of the contents are left after use.

DO NOT MIX WITH OTHER CLEANING PRODUCTS.

Directions

To unblock drains or pipes: slowly add 500g of Caustic Soda to 5 litres of cold water and stir with a wooden stick. Pour carefully down the drain or pipe. After 20-30 minutes flush with clean boiling water. Repeat as necessary. After use the stick should be washed with water and discarded. To purify and keep drains clear, proceed as above, but add 125g of Caustic Soda to 5 litres of cold water.

Health and Safety

See MSDS for full information.
