

## Clean Spirit Technical Data Sheet

### Description

Bartoline Clean Spirit is a highly effective water-based alternative to White Spirit that is safer for you and the environment. The formulation contains all biodegradable ingredients. A high-tech mix of low VOC components, Clean Spirit is non-toxic, virtually odourless and is non-flammable.

Clean Spirit can be used to clean all water-based, and most oil-based paints from brushes, rollers and paint pads. Contains a conditioning agent, leaving brushes soft and supple. May also be used to clean paint spills from surfaces such as worktops, laminate flooring, most textiles, glass etc.

### Directions

Cleaning Brushes, Rollers and Paint Pads: Remove as much paint as possible using a cloth or newspaper. Pour a quantity of Clean Spirit into a generous sized container, dip the implement into the solution and work in well. Remove from the container and using a cloth rub in the solution. Repeat the above if necessary always using fresh Clean Spirit. Rinse in clean water and dry. Note: Heavily coated paint implements may require a number of applications. Certain paints may not be suitable for use with Clean Spirit. In these cases, White Spirit should be used instead.

Cleaning Spills from Hard Surfaces: Absorb as much paint as possible with a cloth or paper towel. Pour a generous quantity of Clean Spirit onto a cloth or paper towel and wipe the surface until all paint has been removed. Rinse with clean water and dry.

Cleaning Spills from Textiles: Test a small patch for colour fastness. Pour a quantity of Clean Spirit directly onto the affected area and rub vigorously until paint has been removed. Rinse or wash with clean water. Can also be used for cleaning small spills from carpets.

### Health & Safety

See MSDS for full information.

### **Technical Data**

<b>Measurement</b>	<b>Value</b>	<b>Test Method</b>
Physical State	Liquid	Visual
Colour	Clear water white	Visual
Odour	Slight detergent	
Flash point	>75°C	
VOC content	63g/l	
Density	1.012	
pH	10.2
