

Ready Mixed Fine Surface Filler Technical Data Sheet

Description

Bartoline Fine Surface Filler is a ready to use, super smooth filler, which is suitable for repairs to small holes, dents and nicks and a wide range of imperfect interior surfaces. The fine particles enable a smooth finish which dries white and may be overpainted. It has good adhesion and gives a strong repair in all applications.

Directions

Preparation: Ensure surfaces to be filled are clean, dry and dust free. Seal exposed nail and screw heads with an oil-based paint to prevent rusting.

Application: Apply in a thin layer, using a filler knife or trowel, pressing into cavities. If a deeper repair is required, build up the filler in thinner layers, or use Bartoline All Purpose Ready Mixed Filler, followed by the fine surface filler. For a perfect finish fill slightly proud of the surrounding surface and use fine abrasive to blend in the repair.

Cleaning & Storage

Tools and equipment should be cleaned with water immediately after use. Replace cap/lid after use to prevent any unused filler from drying out. Wash hands with soap and water after use.

PROTECT FROM FROST

Health and Safety

See MSDS for full information.

Technical Data

Measurement	Value	Test Method
Physical State	Paste	Visual
Colour	White	Visual
Odour	PVA Type
