# SAFETY DATA SHEET

**BARTOLINE - Raw Linseed Oil**

This SDS is not mandated under REACH Regulation (EC) No 1907/2006 and is provided for information only.

## SECTION 1: Identification of the substance/mixture and of the company/undertaking

1. **Product identifier**

   **Product name**  
   BARTOLINE - Raw Linseed Oil

   **Chemical name**  
   Linseed oil

   **Synonyms; trade names**  
   Crude linseed Oil, Refined linseed Oil

   **REACH registration notes**  
   Exempt registration under Annex V

   **CAS number**  
   8001-26-1

   **EC number**  
   232-278-6

1.2. **Relevant identified uses of the substance or mixture and uses advised against**

   **Identified uses**  
   A liquid intended as a coating for timber substrates which replaces natural oils.

1.3. **Details of the supplier of the safety data sheet**

   **Supplier**  
   Bartoline Limited
   Barmston Close
   Beverley
   East Yorkshire
   HU17 0LW
   01482 678710
   info@bartoline.co.uk

   **Contact person**  
   Product Compliance Manager

1.4. **Emergency telephone number**

   **Emergency telephone**  
   01482 678710 (8.30am - 4.45pm Monday to Friday) or NHS 111 (General Public) (24 Hour service)

   **National emergency telephone number**  
   National Poisons Information Service (24hours) 0844 892 0111

## SECTION 2: Hazards identification

2.1. **Classification of the substance or mixture**

   **Classification (EC 1272/2008)**

   **Physical hazards**  
   Not Classified

   **Health hazards**  
   Not Classified

   **Environmental hazards**  
   Not Classified

   **Human health**  
   Spills of the oil may constitute a slip hazard.

   **Physicochemical**  
   Rags soaked in oil may spontaneously ignite (see section 6).
BARTOLINE - Raw Linseed Oil

2.2. Label elements
EC number 232-278-6
Authorisation number ◆60◆
Hazard statements NC Not Classified

2.3. Other hazards

SECTION 3: Composition/information on ingredients

3.1. Substances
Product name BARTOLINE - Raw Linseed Oil
Chemical name Linseed oil
REACH registration notes Exempt registration under Annex V
CAS number 8001-26-1
EC number 232-278-6
Ingredient notes Non-classified vPvB substance.
Composition comments This product does not contain any substances classified as Substances of Very High Concern (SVHCs). A naturally occuring triglyceride vegetable oil derived from the seed of the flax plant Linium usitatissimum.

SECTION 4: First aid measures

4.1. Description of first aid measures
General information This is a non hazardous mixture and as such any ill health effects are unlikely to have been caused by contact with this product. CAUTION! First aid personnel must be aware of own risk during rescue! IN CASE OF SERIOUS OR PERSISTENT CONDITIONS, CALL A DOCTOR OR THE NHS 111 SERVICE.

Inhalation Unlikely route of exposure. Move the exposed person to fresh air at once. Get medical attention. Provide rest, warmth and fresh air. When breathing is difficult, properly trained personnel may assist affected person by administering oxygen.

Ingestion NEVER MAKE AN UNCONSCIOUS PERSON VOMIT OR DRINK FLUIDS. Rinse mouth thoroughly with water. Give plenty of water to drink. Get medical attention if any discomfort continues.

Skin contact Remove contaminated clothing. Wash the skin immediately with soap and water. Get medical attention promptly if symptoms occur after washing.

Eye contact Immediately flush with plenty of water for up to 15 minutes. Remove any contact lenses and open eyelids wide apart. Get medical attention if symptoms are severe or persist after washing.

Protection of first aiders This is a non hazardous product and therefore no protection should be required, however consideration should be given to other contaminants in the workplace.

4.2. Most important symptoms and effects, both acute and delayed
General information The product is considered to be a low hazard under normal conditions of use. Treat symptomatically.

Inhalation No specific symptoms known.

Ingestion May cause discomfort if swallowed.

Skin contact There may be mild irritation at the site of contact.
Eye contact  May cause temporary eye irritation.

4.3. Indication of any immediate medical attention and special treatment needed

Notes for the doctor  Treat symptomatically.

Specific treatments  No specific chemical antidote is known to be required after exposure to this product.

SECTION 5: Firefighting measures

5.1. Extinguishing media

Suitable extinguishing media  Extinguish with foam, carbon dioxide, dry powder or water fog. Use water spray to cool surfaces exposed to fire and protect personnel.

Unsuitable extinguishing media  Do not use water jet as an extinguisher, as this will spread the fire.

5.2. Special hazards arising from the substance or mixture

Specific hazards  Although the product is not classed as oxidizing there is a danger of any cloths contaminated with the oil to self combust. No specific precautions due to the small quantities handled.

Hazardous combustion products  Incomplete combustion and thermolysis may produce gases of varying toxicity such as carbon monoxide, carbon dioxide, various hydrocarbons, aldehydes and soot. These may be highly dangerous if inhaled in confined spaces or at high concentrations.

5.3. Advice for firefighters

Protective actions during firefighting  Keep upwind to avoid inhalation of gases, vapours, fumes and smoke. Ventilate closed spaces before entering them. Move containers from fire area if it can be done without risk. Use water SPRAY only to cool containers! Do not allow water to contact any leaked material. Keep run-off water out of sewers and water sources. Dike for water control.

Special protective equipment for firefighters  In case of a large fire or in confined or poorly ventilated spaces, wear full fire resistant protective clothing and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode. Use protective equipment appropriate for surrounding materials.

SECTION 6: Accidental release measures

6.1. Personal precautions, protective equipment and emergency procedures

Personal precautions  Avoid contact with skin and eyes. Wear protective clothing as described in Section 8 of this safety data sheet. There is a danger that cloths or rags used to clean up a spill, or even any absorbent material may spontaneously combust. Any cloths should be washed in warm soapy water and be disposed of without crumpling. Absorbents should be sprayed with water prior to disposal.

For non-emergency personnel  No specific advice required.

For emergency responders  Wear protective clothing as described in Section 8 of this safety data sheet. See section 11 for additional information on health hazards. For waste disposal, see section 13.

6.2. Environmental precautions

Environmental precautions  Do not discharge into drains, water courses or onto the ground. Spillages or uncontrolled discharges into watercourses must be IMMEDIATELY alerted to the Environmental Agency or other appropriate regulatory body.
BARTOLINE - Raw Linseed Oil

6.3. Methods and material for containment and cleaning up

Methods for cleaning up
Stop leak if safe to do so. Absorb in vermiculite, dry sand or earth and place into containers. Do not contaminate water sources or sewer. Clean contaminated area with oil-removing material. Ensure that waste and contaminated materials are collected and removed from the work area as soon as possible in a suitably labelled container.

6.4. Reference to other sections
Reference to other sections
For personal protection, see Section 8. See Section 11 for additional information on health hazards. See Section 12 for additional information on ecological hazards. For waste disposal, see Section 13.

SECTION 7: Handling and storage

7.1. Precautions for safe handling
Usage precautions
Always remove oil with soap and water or skin cleaning agent, never use organic solvents. Do not use oil-contaminated clothing or shoes, and do not put rags moistened with oil into pockets. Contaminated rags and cloths must be put in fireproof containers for disposal. Good personal hygiene procedures should be implemented. Wash hands and any other contaminated areas of the body with soap and water before leaving the work site.

Advice on general occupational hygiene
Do not eat, drink or smoke when using this product. Take off immediately all contaminated clothing and wash it before reuse. Wash contaminated skin thoroughly after handling.

7.2. Conditions for safe storage, including any incompatibilities
Storage precautions
Avoid contact with oxidising agents. Store in closed original container at temperatures between 8°C and 28°C.

Storage class
Unspecified storage.

7.3. Specific end use(s)
Specific end use(s)
The identified uses for this product are detailed in Section 1.2.

Usage description
Product can be applied with brush or by cloth, all application materials should be washed in warm soapy water and disposed of without crumpling. Always follow on pack instructions when using this product. Apply "common sense" measures when handling this product. Keep out of reach of children. Keep containers closed when not in use. Where possible avoid prolonged contact with the skin. People with sensitive skin should wear rubber protective gloves.

SECTION 8: Exposure Controls/personal protection

8.1. Control parameters
Occupational exposure limits
According to the Suppliers MSDS this substance has no occupational exposure limit values.
BARTOLINE - Raw Linseed Oil

Ingredient comments
There is no data for the product as a whole.

DNEL
No data available from supplier of the substances.
Substance not notified on REACH Registration portal.

DMEL
No data available from the substance supplier.
Substance not notified on REACH Registration portal.

PNEC
Substance not notified on REACH Registration portal.
No data available from the substance supplier.

8.2. Exposure controls

Protective equipment

Appropriate engineering controls
Provide adequate ventilation.

Eye/face protection
Chemical splash goggles and face shield.

Hand protection
Although the product is not classified as a skin irritant, the wearing of gloves is recommended for people with sensitive skin or for prolonged or repeated use. Wear protective gloves made of the following material: Nitrile rubber.

Other skin and body protection
Wear suitable protective clothing as protection against splashing or contamination.

Hygiene measures
Wash hands at the end of each work shift and before eating, smoking and using the toilet. Wash promptly if skin becomes contaminated. Promptly remove any clothing that becomes contaminated. Use appropriate skin cream to prevent drying of skin. When using do not eat, drink or smoke. Good personal hygiene procedures should be implemented.

Respiratory protection
If used in accordance with section 7 of this MSDS the use of respiratory protection should not be required. Respiratory protection may be required if excessive airborne contamination occurs.

Thermal hazards
Not Applicable

Environmental exposure controls
Keep container tightly sealed when not in use. Store in a demarcated bunded area to prevent release to drains and/or watercourses.

SECTION 9: Physical and Chemical Properties

9.1. Information on basic physical and chemical properties

Appearance
Coloured liquid.

Colour
Light (or pale). Brown.

Odour
Oil-like.

Odour threshold
Not available.

pH
Not relevant.

Melting point
Not applicable.

Initial boiling point and range
100 Degrees C (water)

Flash point
> 150°C

Evaporation rate
Not applicable.
BARTOLINE - Raw Linseed Oil

Upper/lower flammability or explosive limits
Not applicable.

Vapour pressure
Not applicable.

Vapour density
Not relevant.

Relative density
0.933 @ 15.5°C

Bulk density
933 kg/m³

Solubility(ies)
Immiscible with water. Soluble in the following materials: Aromatic solvents. Hydrocarbons.

Partition coefficient
Not applicable.

Auto-ignition temperature
Not applicable.

Decomposition Temperature
Not available.

Viscosity
0.5 poise @ 25°C

Explosive properties
Not explosive (EC A 9, closed cup)

Explosive under the influence of a flame
Not considered to be explosive.

Oxidising properties
This product is not considered oxidising based on chemical structure considerations.

Comments
Information declared as "Not available" or "Not applicable" is not considered to be relevant to the implementation of the proper control measures. Information given is applicable to the product in its ready-to-use form.

SECTION 10: Stability and reactivity

10.1. Reactivity
Reactivity
See section 6 for auto-ignition hazard of oil soaked rags/absorbents.

10.2. Chemical stability
Stability
Stable at normal ambient temperatures and when used as recommended. Exposure to sunlight may cause a bleaching effect.

10.3. Possibility of hazardous reactions
Possibility of hazardous reactions
Under normal conditions of storage and use, no hazardous reactions will occur. Although the oil itself is not classified as hazardous, every attention must be drawn to the danger of spontaneous combustion. DANGER OF SPONTANEOUS COMBUSTION. AFTER USE, ANY CLOTHS OR RAGS SHOULD BE WASHED IN WARM SOAPY WATER TO REMOVE THE OIL. EVEN AFTER WASHING THE RAGS MUST NEVER BE CRUMPLED INTO A BALL BUT SPREAD OUT AND DISPOSED OF. USE SYNTHETIC FIBRE CLOTHS WHERE POSSIBLE AS NATURAL FIBRES, ESPECIALLY COTTON, INCREASE THE CHANCES OF SPONTANEOUS COMBUSTION. See section 6 and 16.

10.4. Conditions to avoid
Conditions to avoid
Avoid excessive heat for prolonged periods of time. Avoid exposure to high temperatures or direct sunlight.

9.2. Other information
Volatile organic compound
There are no VOCs present.
BARTOLINE - Raw Linseed Oil

10.5. Incompatible materials
Materials to avoid

10.6. Hazardous decomposition products
Hazardous decomposition products
In case of fire irritating fumes and smoke will be evolved.

SECTION 11: Toxicological information

11.1. Information on toxicological effects
Toxicological effects
No data for the product as a whole. Expected to have a very low order of toxicity.

Acute toxicity - oral
ATE oral (mg/kg) 2,000.01

Acute toxicity - dermal
ATE dermal (mg/kg) 2,000.01

Acute toxicity - inhalation
ATE inhalation (vapours mg/l) 20.01

Inhalation
Unlikely to be hazardous by inhalation because of the low vapour pressure of the product at ambient temperature.

Ingestion
No specific symptoms known.

Skin contact
Prolonged contact may cause dryness of the skin.

Eye contact
May cause temporary eye irritation.

Route of exposure
Ingestion Skin and/or eye contact

Target organs
Eyes Skin

Medical symptoms
Dry skin.

Medical considerations
Skin disorders and allergies.

SECTION 12: Ecological Information

Ecotoxicity
There is no Ecotoxicity data for the product as a whole. Not regarded as dangerous for the environment.

12.1. Toxicity
Acute aquatic toxicity
Not considered toxic to fish.

12.2. Persistence and degradability
Persistence and degradability
By analogy with rapeseed oil expected to be >98% after 21 days when tested to the OECD 301B method.

12.3. Bioaccumulative potential
Bioaccumulative potential
No data available on bioaccumulation.

Partition coefficient
Not applicable.

12.4. Mobility in soil
Mobility
Not available.
BARTOLINE - Raw Linseed Oil

12.5. Results of PBT and vPvB assessment

Results of PBT and vPvB assessment

This substance is considered not to be PBT and vPvB.

12.6. Other adverse effects

Other adverse effects

Not applicable.

SECTION 13: Disposal considerations

13.1. Waste treatment methods

General information

The generation of waste should be minimised or avoided wherever possible. Waste should be treated as controlled waste. Dispose of waste to licensed waste disposal site in accordance with the requirements of the local Waste Disposal Authority. Rags and the like, moistened with flammable liquids, must be discarded into designated fireproof bucket.

Disposal methods

Dispose of waste and residues in accordance with local authority requirements. Recover and reclaim or recycle, if practical. Larger quantities should be treated in a suitable plant or disposed of via a licensed waste disposal contractor. Waste liquid components should be suitable for incineration at an approved facility.

Waste class

Waste liquid can be classified as organic waste with the European waste code 16 03 05. Waste absorbents and wiping cloths contaminated with linseed oil should be classed as waste code 15 02 03.

SECTION 14: Transport information

14.1. UN number

Not applicable.

14.2. UN proper shipping name

Not applicable.

14.3. Transport hazard class(es)

No transport warning sign required.

14.4. Packing group

Not applicable.

14.5. Environmental hazards

Environmentally hazardous substance/marine pollutant

No.

14.6. Special precautions for user

Not applicable.
BARTOLINE - Raw Linseed Oil

14.7. Transport in bulk according to Annex II of MARPOL and the IBC Code

Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

Not applicable.

SECTION 15: Regulatory information

15.1. Safety, health and environmental regulations/legislation specific for the substance or mixture

National regulations

- Health and Safety at Work etc. Act 1974 (as amended).
- The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment Regulations 2009 (SI 2009 No. 1348) (as amended) ["CDG 2009"].
- Control of Substances Hazardous to Health Regulations 2002 (as amended).
- Users of this product are reminded of their duties under the current Control of Substances Hazardous to Health Regulations and a suitable and sufficient assessment of all the risk should be undertaken before using this product. The guidelines given in the HSE publication COSHH ESSENTIALS - Easy Steps To Control Chemicals gives sound advice for deciding safe working control measures.

EU legislation

Guidance

- Workplace Exposure Limits EH40.
- Classification and Labelling of Substances and Preparations Dangerous for Supply.

Health and environmental listings

- Control of Pollution Act 1974.

Authorisations (Title VII Regulation 1907/2006)

- No specific authorisations are known for this product.

Restrictions (Title VIII Regulation 1907/2006)

- No specific restrictions on use are known for this product.

15.2. Chemical safety assessment

No chemical safety assessment has been carried out.

SECTION 16: Other information

General information

- Only trained personnel should use this material. Linseed oil is frequently bottled for general DIY applications. Although the oil itself is not classified as hazardous, every attention must be drawn to the danger of spontaneous combustion and a high profile warning is essential. The following warning is recommended: DANGER OF SPONTANEOUS COMBUSTION. AFTER USE, ANY CLOTHS OR RAGS SHOULD BE WASHED IN WARM SOAPY WATER TO REMOVE THE OIL. EVEN AFTER WASHING THE RAGS MUST NEVER BE CRUMPLED INTO A BALL BUT SPREAD OUT AND DISPOSED OF. USE SYNTHETIC FIBRE CLOTHS WHERE POSSIBLE AS NATURAL FIBRES, ESPECIALLY COTTON, INCREASE THE CHANCES OF SPONTANEOUS COMBUSTION. BRUSHES AND ROLLERS SHOULD BE CLEANED WITH WHITE SPIRIT AND THEN WASHED IN WARM SOAPY WATER.

The information contained in this data sheet is provided in accordance with the requirements of the Regulation (EC) No 1907/2006 Annex II as amended by Regulation (EU) 2015/830 and Regulation (EC) No 1272/2008 (CLP). The product should not be used for purposes other than those shown in Section 1.2. As the specific conditions of use are outside the supplier's control, the user is responsible for ensuring that the requirements of relevant legislation are complied with. The information contained in this safety data sheet is based on the present knowledge and the current EU and UK Legislation. It provides guidance on health, safety and environmental aspects of the product and should not be taken as a product specification. This information relates only to the specific material designated and may not be valid for such material used in combination with any other materials or in any process. Such information is, to the best of the company's knowledge and belief, accurate and reliable as of the date indicated. However, no warranty, guarantee or representation is made to its accuracy, reliability or completeness. It is the user's responsibility to satisfy himself as to the suitability of such information for his own particular use.
