

## **Traditional Sugar Soap** **Technical Data Sheet**

### **Description**

Bartoline Sugar Soap is a powerful and effective cleaner, used by the professional decorator for many years, for preparing surfaces prior to painting. Bartoline Sugar Soap will cut through grease and grime, including nicotine stains, and makes repainting easier. May be used inside and outside. May be used for cleaning building exteriors. Will remove old paint stains from masonry, facing slabs and stonework. Removes moss from flagstones. Also suitable for cleaning garage floors and driveways. Will clean oil and grease from concrete and asphalt surfaces. Bartoline Sugar Soap can also be used as a general household cleaner.

### **Directions**

#### **FULL STRENGTH**

For cleaning and preparing paintwork: Mix 500g of the contents with 10 litres of warm water. Apply liberally using a sponge or absorbent cloth. Work from the bottom of the surface to the top to avoid run lines. Rinse with fresh water and allow to dry completely.

#### **HALF STRENGTH**

For general household cleaning: Mix 250g of the contents with 10 litres of warm water. Soak a sponge or absorbent cloth in the solution and wring out so it does not drip. Wipe surface vigorously. Rinse with clean cold water.

### **Other uses**

May be used for cleaning baths, basins and ceramic tiles. Add 50g to 2 litres of warm water. Soak sponge or absorbent cloth in the solution and wring out so it does not drip. Wipe surface and rinse with clean cold water. Also suitable for cleaning toilet bowls. Add 50g into toilet, leave overnight and flush.

### **Precautions**

Any spillage should be mopped up immediately as spotting may occur. Cover polished surfaces, lino, carpets and soft furnishings to avoid splashing.

## Health and Safety

See MSDS for full information.

## Technical Data

Measurement	Value	Test Method
Physical State	Powder	Visual
Colour	Off white	Visual
Odour	Acrid detergent	
Flash point	N/A	
pH	9.5 - 10.5
